SUMMARY

Software Engineering graduate (B.S., *Cum Laude*) and U.S. Marine Corps veteran pivoting into frontend and Python development. PCEP and PCAP certified with hands-on experience across a variety of languages/technologies from academic and capstone work. Have previously held a TS/SCI clearance.

EDUCATION

Arizona State University

Graduated May 2026

B.S., Software Engineering

Online/Tempe, AZ

- GPA: 3.55/4.00, graduated *Cum Laude*
- Relevant coursework: Database management, Web-Based Applications, Mobile Systems, Data Structures and Algorithms

CERTIFICATIONS, SKILLS, & INTERESTS

- **Certifications:** PCEP™ – Certified Entry-Level Python Programmer, PCAP™ – Certified Associate Python Programmer
- **Technologies:** Java, Python, JavaScript, HTML5, CSS3, React and React Native, Kotlin and Kotlin Multiplatform
- **Skills:** Web Development, Mobile App Development, Frontend, Backend, Full-stack, Attention to Detail, Consultative Sales, Administrative, Office Suite Proficiency, Client Relations, Project Coordination, Inventory and Document Management
- **Interests:** Weightlifting, Running, Reading, Traveling, Cooking, Baking, Locksport

RELEVANT PROJECTS

- **Poste:** An iOS and Android content-saving app for saving and categorizing social media posts to one centralized location across all social media platforms as well as sharing posts and folders between users. This was a full-stack project developed using Kotlin Multiplatform with authentication handled by Clerk and a Postgres database hosted on Railway. Building this application with my Capstone team was an awesome opportunity that gave me some experience with frontend development, database management, authentication, requirements elicitation, documentation, and project management. You can read more about this project [here](#) or view a demo of it [here](#).

WORK EXPERIENCE

RAM Supply, LLC.

Aug. 2016 – Nov. 2019

Sales / Technician / Financing Associate

Eagleville, MO

- Built and maintained an Excel-based inventory system tracking ~\$150K in parts and units for insurance and daily operations, improving stock accuracy and claim readiness.
- Managed email and telephone communications with equipment and parts suppliers to keep day-to-day operations running smoothly.
- Owned the financing and warranty documentation process for equipment purchases, handling sensitive customer and financial paperwork with precision while advising customers on equipment selection.

United States Marine Corps

Aug. 2011 – Aug. 2016

Cryptologic Linguist, Middle Eastern-Arabic

Camp Pendleton, CA

- Held TS/SCI security clearance while operating sensitive classified systems and managing the handling and dissemination of classified material in support of real-time force protection during deployment.
- Designed and taught an IP-networking and subnet-masking course to fellow Marines, achieving 100% competency across the unit.
- Assisted in developing and implementing a clear emergency destruction plan ensuring no classified spillage during evacuation.
